We talk of the costs as an affair affich is soon to costs to But how can it pass away without a radical change of our saver. circumstances? The burthen of our debt cannot be removed; our consumption must be accommodated to what we can produce, beyond the annual tax of interest and imports. Banks or no banks, Government en mity or Government favor, our condition vethose taskmasters are our foreign creditors!-

ABSTRACT OF THE REPORT OF THE SECRETARY OF WAR.

This document being too lengthy for our columns, we take the liberty of presenting a portion of it to our readers in as condensed a form as possible.

Evening Gaz.

It will be seen that the army, during the past year, has been kept in active service in Florida, as well as the northwestern and maritime frontiers. The necessity of keeping our troops together in as large masses as possible is also shown. The camp of in- that is, to announced this He struction at Trenton is said to have had providing for the enlistment of boys for the naval service so as to embrace the army, is and near Detroit, be repared and recon-structed. It is stated the while our soldiers are better clothed and fed than those of other nations they are worse lodged. It is therefore deemed essential to their health and morals that this evil be remedied by constructing barracks, where they may be perminently and comfortably quartered. * The conduct of Ross and his party to-

wards the signers of the treaty at New Echota, the turbulent conduct of the Seminoles and Cherokees, the murders &c. and the untriendly disposition of some of them towards the whites, render the speedy completion of the chain of posts on the western

frontier necessary.

The Secretary, from personal inspection as well as from the report of the Chief Engineer, pronouuces our maratime defences to be totally inadequate to the purpose of security against an invading enemy. Boston and Newport are nearly in a condition to repel invasion; but Portsmouth, New York, Philadelphia, Baltimore, Charleston, Savanash, Pensacola, and all the ports in the Gulf, require farther protection to render them safe from attack.

In respect to the organization of the militia he proposes to divide the United States into eight military districts, and to organize the militia, in each district, so as to have a body of trelve thousand five hundred men in active service; and another of equal number as a reserve. The age of the recruit to be from twenty to thirty-seven. The whole term of service to be eight years; four years in the first class, and four in the reserve. One fourth part, twenty five thousand men, to leave the service every year, passing, at the conclusion of the first term, into the reserve, his head and grieve with inward bittern ss kind of stand at ease position, with their world's goods, nor lament thy poverty. Out man, andgiving him the place, which is a together at the the end of the second. In this manner, twenty five thousand men will be discharged from military duty every year and twenty-five thousand fresh recruits eceived into the service.

CHEVALIER, also, in his justly celebrated letters, lately published, while commenting on the ill-requital of distinguished public men in America, who spend and are spent in our our service, makes the following mention of General Harrison, whom he encountered in

Cincinnati:-

"I had observed at the hotel table a man of about the medium height, stout and muscular, and of about the age of sixty years, yet with the active steps and lively air of youth. I had been struck with his open and cheerful expression, the amenity of his manners, and a certain air of command, which appeared through his plain dress. 'That is,' said my triend, General Harrison, Clerk of the Cincinnati Court of Common Pleas.'-What! General Harrison, of the Tippecanoe and the Thames? The same; the ex-general, the conquerer of Tecumseh and Proctor; the avenger of our disasters on the Raisin. and at Detroit; the ex governor of the Territory of Indiana, the ex-senator in Congress, the ex-minister of the United States to one of the South American republics. He has grown old ig the service of his country; he has passed twenty years of his life in those fierce wars with the Indians, in which there was less glory to be won, but more dangers bo be encountered, than at Rivoli and Australitz. He is now poor, with a numerous family, seglected by the Federal Govern-ment, ethough yet vigorous, because he had the independence to think for himself. As the opposition is in the majority here, his friends have bethought themselves of coming oving the Clerk of the lucrative one, as a sort of retiring pension. sight of heaven, as from the most gorgeous His friend in the East talk of making him President of the United States.
